

Where ideas work

**Ministry of Forests
Cranbrook, Nelson (Hybrid)**

There is currently one (1) permanent, full-time position available. Flexible work options are available; this position may be able to work up to two (2) days at home per week subject to an approved telework agreement.

This position is also posted as a Biologist 27 via [Requisition 112748](#).

**Research Vegetation Ecologist
\$77,718.46 - \$99,452.15 annually**

The Ministry of Forests delivers holistic resource management services for British Columbians and manages specified Crown land and resources in a manner that embraces the economic, environmental and social goals of government.

The Research Vegetation Ecologist is a scientific advisor in the field of natural resource management. In this role, you conduct applied research to support science-based decision-making, provide professional advice related to vegetation ecology and classification and lead multidisciplinary research projects. This position conducts ecosystem research, creates and maintains the bio geoclimatic ecosystem classification and its interpretations and applications, and communicates results to scientific and technical users.

The BC Public Service is committed to creating a [diverse workplace](#) to represent the population we serve and to better meet the needs of our citizens. Consider joining our team and being part of an innovative, inclusive and rewarding workplace.

For information about the Indigenous Applicant Advisory Service, please visit: [Indigenous Applicant Advisory Service - Province of British Columbia \(gov.bc.ca\)](#).

Qualifications for this role include:

- Registered, or immediately eligible for registration, as Registered Professional Forester (RPF) with Forest Professionals BC (FPBC), or as a Professional Agrologist (PAG) with the BC Institute of Agrologists (BCIA).
- Thesis-based M.Sc. or higher, specializing in forestry, natural resource management, vegetation ecology, agriculture. An equivalent combination of education and/or experience may be considered.
- Minimum three (3) years of experience working with BC's Bio geoclimatic Ecosystem Classification (BEC) system, or equivalent system, both in the field and in planning/desktop applications.
- Demonstrated experience planning and implementing research projects.
