WINNIPEG

Student Course Evaluation Results

Course Number: MATH-1301-006 21

Course Title: Appl Math for Bus & Admin 21

Faculty Name: Lucas Mol 21

Term: U2020W 21

This course is required or elective:

Field	20 Responses	
	Required	Elective
Count	18	2
Percentage	90%	10%

Overall, apart from the course content, the quality of teaching provided by the above-named instructor was:

Field	21 Responses	
	Unsatisfactory	Satisfactory
Count	1	20
Percentage	5%	95%

Student Comments:

Professor is very good at explaining concept

N/A

N/A

Dr. Mol as a professor was really good and I have recommended him as a professor to friends before. When you ask him questions he answers them clearly and makes sure that you fully understand the context. He doesn't really have any weaknesses aside from maybe just writing very fast but. Although, he does post the notes after class so I am able to catch up with the notes for the next class.

Good

Average.

Dr. Mol is an amazing teacher to take Applied Math with especially if you require the course. He provides very detailed demonstration on how to solve a specific math problem and offer to help you to understand harder concepts better. His live zoom classes are always very informative and his explanation are very easy to understand and grasp. He is very straightforward and offers different ways on how you can go about solving a math equation. I also think that his notes are very helpful and full of information. I am very satisfied how he was able to deliver the class online and help us during his office hours.

Awesome instructor. Explains things extremely well and is always willing to help any student if they have a question during class. Dr. Mol is also extremely organized and uses the nexus interface better than most of the instructors I've had in both university and college. I don't miss a single thing because he makes it easy to follow along. The only thing I could even think of would be that we fly through the course material, but we are just following curriculum and he has no control over that. I'd recommend Lucas Mol to anyone going into a mathematics course.

STRENGTHS NOTES ARE CLEAR. LECTURES ARE CLEAR AND EASY TO FOLLOW. INSTRUCTOR IS ENGAGING AND TAKES THE TIME TO ANSWER QUESTIONS. STAYS AROUND AFTER CLASS TO HELP STUDENTS AND ALSO ANSWERS QUESTIONS. OVERALL FRIENDLY PERSONALITY MAKES LEARNING MATH EASIER! WEAKNESSES NONE

Strengths: patient, explains topics at a good pace so it's easy to follow, very attentive to questions and replies timely to emails and questions

Talking about strengths, Dr. Mol explains content very clearly, step by step. Always clear any doubt in the class. he is very friendly with students. On the other hand, he should improve interactions with students a little more.

There is simply no weakness for this Professor. He simplified tough subjects in math to where a 5th grader can understand. I know because every math class I took in U of W resulted in a D or an F, but this class has been very very helpful.

strengths: provides a lot of practice problems to help learn concepts weaknesses: personally, I find him unapproachable and I feel nervous to ask questions about the material

The instructor is very hands-on on every topic that we went over this semester. The only downside is that I wish that we were given more time to do the Midterm so we can actually finish every question.

I really enjoyed his lecture. His teaching style is great. I got an immediate reply to my queries every time. He is approachable and makes clear our doubts. He stays for a while and doesn't hesitate to answer our problems even after a class is over. After all, I really enjoyed being his student. I really wish to take his class in the future.

His strengths: I'd say everything. He's super helpful and he takes a lot of time going over concepts that are unclear to us. He is super understanding and genuinely cares about us succeeding in the course, and life as well. His teaching speed is not too fast and he explains everything really well. He is super respectful to everyone and we all leave the class with a smile on our face. His weaknesses: the only thing would be that we are sometimes behind the other class in terms of material, but that's only because we have a lot of questions, and he makes up for it by posting more notes over the weekend. He has made an impact on me and many of my classmates. Honestly, it would be a shame to let this professor go.

Organized, good explanations

The best teacher I've had at the University so far! Keeps class interesting, really cares about students and always answers questions fast and informatively, would definitely want him as a professor again in the future!!!

Professor Mol is very good at taking time to answer any questions during lectures, which I find is incredibly important especially in a math course! He is very helpful during office hours and offers a wide variety of appointment slots to accommodate differing schedules.

Dr. Mol was a great professor! He was encouraging, our classes were very informative, we all worked together in our workbook, making it less intimidating for those who are not great at math, like myself. Our weekly assignments were very helpful in keeping us engaged and allowed lots of time for practice and preparation for our midterms/exams.
